

# CYBERSECURITY

## PROVIDING PEACE OF MIND FOR YOUR GROWING BUSINESS

Cyberattacks are happening at a rapid pace to businesses of all sizes and cyber criminals are discovering even more opportunities to disrupt business continuity. Are you confident your network is secure? Windham Brannon provides services and solutions to protect against cyberattacks. We can help your business take a strategic approach to maintain a safe environment and mitigate the risk of a data breach.

## ABOUT WINDHAM BRANNON

Since 1957, Windham Brannon has served clients in Atlanta and throughout the Southeast. The firm has expanded its success in serving businesses across a myriad of industries with various advisory, tax, and assurance needs across the country. Quite simply, we offer more to our clients.

### STRATEGIC PLANNING

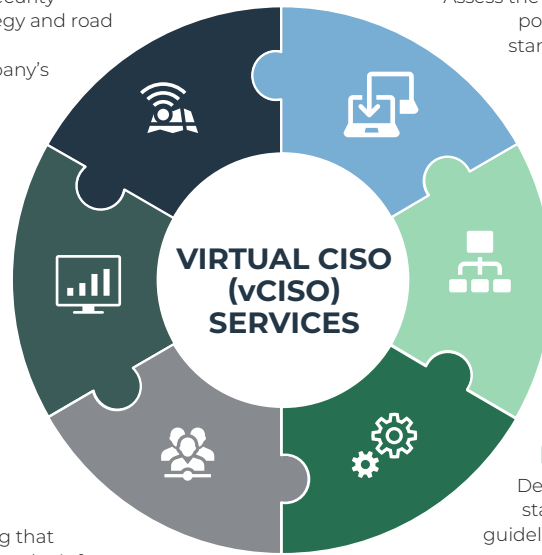

Develop a cybersecurity governance strategy and road map to address the company's strategic goals

### VALIDATION

Internal or external audits or certifications to validate that cybersecurity controls are implemented and operating effectively

### TRAINING

Tailored security awareness training that helps implement and reinforce your company's policies and procedures

### GAP ANALYSIS

Assess the company's cybersecurity posture against an industry standard framework such as NIST CSF or CMMC to identify gaps

### RISK ASSESSMENT

Assess cybersecurity risks by identifying assets, threats, and vulnerabilities to provide recommended controls for gap remediation

### CYBERSECURITY PROGRAM DESIGN

Develop policies, objectives, standards, procedures, and guidelines that address people, processes, and technology
